To Whom It May Concern,

I would like to offer my complete recommendation to Foresight Service, Inc. based on the experience we had with them in resolving a major problem at one of our high schools.

Belleville West High School is a 360,000 square foot facility that opened in 2002. From the beginning, rain water came in to the classrooms through the exterior block wall. The original contractor attempted to resolve the issue but was unsuccessful. Several consultants, architects and engineers were also hired to find the source of the infiltration but were also unsuccessful. In the summer of 2009, the District hired Foresight Services to investigate the problem and serve as our construction manager.

Foresight reviewed the original construction documents, completed testing of the affected area and developed a plan to fix the building. They created construction and bid documents, and provided oversight of the work performed by the general contractor. They handled the entire operation during the repairs that were completed over the summer and early fall.

It has been several months since the work was completed, and we have made it through one of the wettest falls in history. I am happy to report that we no longer have any issues with water coming in to the building. The plan developed by Foresight was flawless.

As I stated, we tried several approaches to fix this problem, but no one had any luck coming up with a solution. The bottom line is Foresight knows how to fix buildings. They have all the experience and resources needed to handle any issue that you may need. Our experience with this company could not have been any better. I give my complete recommendation to Mr. Wayne Korte and his team. They did a great job for us.

If you have any questions, or if I can be of any assistance, please call me at (618) 610-2162.

Sincerely,

Scott Harris
Chief Engineer
BTHS District 201
