
January 5th, 2009

To whom it may concern,

Recently I heard that you may be looking at using Foresight Services to evaluate facilities in the city of Kirkwood. When I heard this I thought I would take a few minutes and let you know that I have been extremely happy with the work they have performed for me over the last 4 years in helping me design and replace my roofing systems in the district. In my 15 years as a Facilities Director in school districts I have worked with many design and consulting firms. I have found Foresight Services to be a company that truly represents the owners interest and is willing to always go the additional mile to ensure customer satisfaction. Because of the construction going on in the Kirkwood School District over the last 5 years that we manage internally I have had to rely on Foresight to help over see that district roofs are being installed correctly and per the specifications. Because they have designed the replacement roofs correctly and have managed these projects efficiently I have seen less than a 1% change order request over the last 5 years thus saving the district dollars. It is for the above reasons that I will once again be seeking the professional services of Foresight Services for the 2009 roofing projects. If you should have any questions or need additional information please feel free to contact me at 314-213-6185 or by e-mail koenigt@gw.kirkwood.k12.mo.us

Sincerely ,

Tony Koenig
Director of Buildings and Grounds
Kirkwood R-7 School District
